To Whom it May Concern:

In August of this year, it was our pleasure to have Dr. Randy Reed speak twice for the Michigan Association of Chiropractors – in Farmington Hills, located in the metro Detroit area, and at our UP Convention, located in the upper convention in Marquette. Both of these seminars were fantastic successes; our 12-hour Farmington Hills seminar on Advanced Decompression Therapy drew more people to this location than ever before – people were literally standing in the aisles!

Dr. Reed was extremely well received. His expertise in decompression therapy, currently one of the hottest topics in chiropractic, is unparalleled, and his entertaining style kept our doctors' attention throughout. One of our doctors told us that they expected him to be extremely knowledgeable; they did not expect him to be so entertaining, as well. Others said that they were motivated to look into spinal decompression for their offices after hearing Dr. Reed on the subject.

Due to the phenomenal success of our seminars with Dr. Reed in August, we are considering using him at one of our state conventions or another seminar series in upcoming years.

I would recommend Dr. Randy Reed to any state association without hesitation.

Sincerely,

Kristine Dowell
Executive Director
